CFE ThermalXtreme HD Paste Extreme Strength

Applications

- ❖ Introducing CFEs ThermalXtreme HD Paste. The ultimate solution for securing "hot tops" and other insulations in place under the most extreme conditions. Engineered with precision and crafted for durability, ThermalXtreme HD is a high-temperature paste specifically designed to withstand the rigors of intense heat environments, ensuring steadfast insulation retention and optimal performance.
- ❖ Whether you're working in industrial furnaces or aerospace applications, ThermalXtreme HD delivers the reliability and performance needed to keep insulations securely anchored. Its low thermal conductivity helps maintain thermal barriers, preventing heat loss and ensuring optimal energy efficiency.

Technical Data

- ❖ Color: White to Off White
- ❖ Temperature Grades: CFE2300: 2300°F (1260°C)
- ❖ Recommend Operating Temperature: CFE 2300: 2000°F (1093°C)
- ❖ 6 Month shelf life from Manuf. Date.
- ❖ Packaged in 1 & 5 gal gal pails, and 11oz caulk tubes
